Claims 1, 2 and 3-13 and 15-25 are presented for examination.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6, 15-17 and 21 are rejected under 35 U.S.C. 102 (b) as being anticipated by Neumann. Neumann teaches the use of an alpha-2 adrenergic agonist and a fatty acid component in a pharmaceutical formulation. See column 4, lines 24-25 and 41-60.

Claims 1, 2, 5, 6, 9-13, 15-17, 20-21 are rejected under 35 U.S.C. 102 (b) as being anticipated by DeSantis Jr. et al. Desantis et al. Teach the use of clonidine with a fatty acid prostaglandin a pharmaceutical formulation for the treatment of glaucoma. The above reference makes clear that prostaglandin has therapeutic effect. See column 2, lines 25-37. The topical ophthalmic use is also taught in claims 1 and 13.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 8, 22, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 0044/355. The WO Patent teaches the use of an alpha-2-adrenergic agonist in combination with a fatty acid in a pharmaceutical formulation. See page 4, lines 22-28, page 7, lines 18-22, page 10, lines 11-13, page 20 example II,

page 22, example 2 and page 23, lines 2-6. The above reference differs from the claimed invention in the specific fatty acid of claims 7 and 8 and the specific agonist and acid of claims 22 and 23. It would have been obvious to a person skilled in the art to substitute one fatty acid for another, considering that the prior art on page 22, example 2 teaches the use of different fatty acids within the chain length of the claimed invention in combination with an alpha-2adrenergic agonist to lower the solubility of the alpha-2 adrenergic agonist.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18, 19, 24 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 18, 19, 24 and 25 are indefinite as to the expression "at least". Such claims fail to set forth an upper limit.
